The diagram shows the R13 component with its internal structure and pin connections. The component is represented by a large oval shape with two circular mounting holes. Inside, there are two main sections: a 4x2 grid of pins on the left and a 3x4 grid of pins on the right. The pins are labeled with numbers 1 through 11. The internal structure is divided into three rows: Row A (top), Row B (middle), and Row C (bottom). The pins are connected to internal components as follows:

| Pin | Internal Component |
|-----|--------------------|
| 11 | 20W |
| 10 | 23F |
| 9 | 20BD |
| 8 | 20BK |
| 7 | LPGA |
| 6 | BE |
| 5 | |
